

## System Requirements

The latest version of Global AlertLink runs on the following Internet browsers:

- Internet Explorer 11 or Edge;
- Google Chrome; or
- Mozilla Firefox.

Visit the links below to download Internet Explorer 11, Chrome, or Firefox and to ensure your computer meets the minimum system requirements.

- [Download Internet Explorer 11](#) – Official Microsoft Download Center
- [Download and install Chrome](#) – Google Chrome Help
- [Download Firefox](#) – Mozilla.org

Note that each browser behaves differently. Visit [www.html5test.com](http://www.html5test.com) for more information on browser compatibility.

Due to changing environments, Global AlertLink only supports TLS (Transport Layer Security) 1.2. If your browser is not compliant with TLS 1.2, you will not be able to access Global AlertLink.
