

Version 8.02 Release Notes

New Features

- (#387) Added a new custom form Review Query for News, Contacts, Documents, Resources, and Forms.
- (#1667) Relationship Reports now have selections for Related Plans and Related Events.
- (#2103) Lookup Fields linked to deleted items will no longer be blank. They will instead display the item as red strikethrough text.
- (#2787) Incident Submission Forms now have support for New by Folder and Update by Folder.
- (#3010) Improved the loading performance of object forms that contain many custom fields or completed forms.
- (#3091) Improved the performance of message queuing and delivery.
- (#3169) Updated the user interface of the mobile pages.
- (#3312) ACE now supports voice calls.
- (#3413) Added functionality to the Relationship Builder on a Plan or Event Dashboard to limit relationships to other plans or events.
- (#3442) Made security updates to 3rd party libraries.
- (#3475) New communication failure messages have been added for when the device address and message text have been left empty.
- (#3542) Updated the default value for Caller ID. Users with an already defined value will not be impacted. Users who wish to change this value must contact Support.
- (#3559) In the event that more than one messaging provider has been configured for a system, the first provider will now be the default.
- (#3569) Improved the performance of response details for viewing a delivered message

Bug Fixes

- (#1581) Corrected a security bug pertaining to XSS.
- (#2920) Fixed an issue where the Action Step Type select list was hidden while adding an Action Step from a dashboard query.
- (#3032) Resolved an issue that caused poor performance and open SQL connections when numerous organizational units were deleted in succession.
- (#3053) Fixed a bug that prevented the Show More function on the Send Message screen from rendering.
- (#3227) Corrected a bug that prevented filtering by folder name when adding a new custom form.
- (#3267) Deleted users in the All Locks grid will no longer be hidden. They will instead be displayed as red

~~strikethrough text.~~

- (#3401) Corrected an issue that prevented locks from being deleted.
- (#3412) Fixed an issue with the login screen where long system names were not displaying properly.
- (#3445) Resolved an issue that caused intermittent rollback for contact imports.
- (#3449) Fixed a bug that prevented the Completed Custom Forms list from rendering.
- (#3509) Corrected an issue with custom field imports.
- (#3514) Corrected an issue that would cause custom fields in reports to be duplicated in field selection, depending on scoping.
- (#3533) Fixed a bug that prevented Broadcasts from being saved to a plan in certain scenarios.
